Multiseat Software for Windows XP/7/8/10

Forget about thin clients and terminals! ASTER is a program (and only a program!), which allows several users to work with one computer independently as if each of them had their own PC.

ASTER is a shared computer access software solution and does not use hardware thin clients or terminal stations. To create an additional workplace, you just need to connect to system block an additional monitor, keyboard and mouse (and if it is needed - microphone, speaker, joystick or gamepad). Monitors may be connected by VGA/DVI/HDMI/DP cables. Other devices - by USB cables:

After the installation and start-up process, ASTER will present a separate desktop on each monitor (dual screen) and users will be able to work with the computer as independently as if each of them had their own PC.

Software-based Solutions

For home application

Schools and universities

Workstations in offices, banks, and post offices

Accounts departments

Computer testing and training

Internet-cafes

Libraries, museums, and reading rooms

Exhibitions, seminars, conferences, presentations

Check-out points and check-in desks

Now several users CAN WORK WITH ONE PC simultaneously and independent...

The program ensures stable operation with a standard set of office, accounting, and training software, graphic applications, and even 3D games. Among our users are the state organizations (e.g. Federal Mail of Russia – over 15 000 setting), the educational and medicine organizations, small enterprises and home users more than in 50 countries of the world.

Today **Aster** is the fastest program of virtualization of desktops e.g. allowing on each desktop independently to play back video or to play computer games, and unique completely the software decision for MS Windows 7/8/10.

Benefits of shared computer access as compared to a separate PC
- Low noise level
- Space is saved
- Upgrading costs are cut down
- Easy application
- Electric power is saved
- Local network is not required
- Environmentally friendly

Comparison with similar shared access and dual monitor software
- Unlike a terminal station or a thin client, excellent operation with graphic applications
- Low price
- Compatibility with most modern video cards
- Responsive support
- Ideal solution for inexpensive computerization of universities, government and commercial companies
